Provides guidance
A state/jurisdiction wants to develop a safe sleep campaign,
Identifies emerging evidence and engages in T
Supports Title V with the tools and resources
A state/jurisdiction has a question about where to find assistance
A state/jurisdiction wants to replicate a practice or
A state/jurisdiction wants to develop a multi-sector implementation
A state/jurisdiction wants to analyze the fit and feasibility of
A state/jurisdiction requests guidance and feedback from the
A state/jurisdiction or MCHB-funded project (like a CoIN)
Connects T
A group of Title V programs who have chosen NPM 9 (Bullying)
Strengthen the Evidence for MCH Programs provides TA to help Title V leaders identify, develop, and implement effective Evidence-based/Informed Strategies Measures (ESMs) and to address questions of how to choose, implement, and evaluate programs based on evidence more broadly.

Specifically, the center:

- Reviews current, state-initiated ESMs annually to provide feedback on how the measures align with NPMs and state strategies and how they are supported by the published evidence and practices in the field.
- Identifies emerging evidence and engages in TA to develop and implement new ESMs through ongoing “check-ups” with states and longer-term TA related to implementation and measurement.
- Provides guidance on the systems to sustain these strategies, the measures necessary to track and report progress, and ways to more fully integrate ESMs with your needs assessment and state action plan.

Examples of TA that the center provides:
- A state/jurisdiction requests guidance and feedback from the center on how to develop meaningful measures for its full list of ESMs before submitting the annual block grant application.
- A state/jurisdiction wants to develop a safe sleep campaign, but isn’t sure whether to base it in the hospital or during prenatal visits and wants to know what the evidence says is effective.
- A group of Title V programs who have chosen NPM 9 (Bullying) want to compare pilot programs to find the most effective behavior change programs.

Examples of TA that the center provides:
- A state/jurisdiction wants to explore and prioritize evidence around school-based health centers while receiving consultation around pilot site initiation.
- A state/jurisdiction wants to analyze the fit and feasibility of adapting a evidence-based developmental screening strategy to a new implementing site.
- A state/jurisdiction wants to develop a multi-sector implementation plan around early and periodic screening, diagnostic, and treatment activities across the state.

Examples of TA that the center provides:
- A state/jurisdiction has received TA on designing its ESMs, and now wants examples of programs that others have used to achieve similar outcomes.
- A state/jurisdiction or MCHB-funded project (like a CoIN) would like to submit an effective practice to Innovation Station.
- A state/jurisdiction would like to replicate a practice or component of a practice from Innovation Station.
- A state/jurisdiction has a question about where to find assistance related to the implementation of a strategy that advances their state action plan.

Examples of TA that the center provides:
- A state/jurisdiction has a question about where to find assistance related to the implementation of a strategy that advances their state action plan.

Examples of TA that AMCHP provides:
- A state/jurisdiction would like to submit an effective practice to Innovation Station.
- A state/jurisdiction or MCHB-funded project (like a CoIN) would like to submit an effective practice to Innovation Station.
