Life Course Indicators Online Tool

Explore the set of 59 life course indicators by Category, Data Source, and Name to expand the section. Individual indicators are denoted with a red dot and include numerous details, such as a brief description, numerical values, similar measures in other indicator sets, and national comparison information. Throughout Fall 2013, AMCHP will continue to add PDF narratives to the tool. These include important notes on calculating the indicator as well as information on how the indicator aligns with the data and life course screening criteria.
